

For Immediate Release

Mistral Amalgamates Group Companies

Bangalore, 31 July 2007 – Mistral a leading product realization company specializing in real-time embedded solutions announced today the amalgamation of its group companies Mistral Software Pvt. Ltd. and Mistral Solutions Pvt. Ltd. The merged company will be called Mistral Solutions Pvt. Ltd.

Established in 1997, Mistral Solutions is a professionally managed technology house undertaking Systems Integration and providing Value added Services targeting the defense and telecom markets. Mistral Software has been providing professional design and development services from concept to product focusing on the embedded domain, covering both hardware and software.

The merger will put in motion a renewed fervor to Mistral's commitment to offer complete end-to-end solutions in the embedded domain. According to CEO Anees Ahmed, "Because of its name, Mistral Software has always been perceived as a software services company. The name did not give complete credence to our hardware design capabilities or as a provider of complete end-to-end solutions. With the amalgamation, we will clearly express our business and expertise in the embedded domain as a provider of hardware and software design, system engineering, VAR and system integration services."

He added that there will be no change in management and Mistral will continue to provide the same products and exceptional services on which they have built their reputation in the embedded industry over the past decade.

About Mistral

Mistral is an ISO 9001:2000 certified and CMMi Level 3 appraised premier product realization Company providing end-to-end services for product design and development in the embedded space.
