Mistral is now an ISO/IEC 27001:2013 Certified Company

Bangalore, India, Tuesday, 03 March 2020: Mistral Solutions, a leading technology design and system engineering company, today announced that, it has been certified for ISO 27001:2013 by TUV-Nord, a world's leading ISO certification organization and an independent accredited registrar company. By meeting and exceeding the extensive criteria for ISO 27001:2013, Mistral asserts its commitment towards information security of its customers' IPs and sensitive documents. As part of this certification, Mistral aims to continually improve on products, services, and internal processes that will help us provide a great customer experience.

ISO/IEC 27001:2013 has been prepared to provide standardised requirements to establish, implement, maintain and continually improve a flawless information security management system within the organisation. ISMS aim to protect the confidentiality, integrity and availability of information by applying a risk management process that includes people, processes and IT systems and gives confidence to all stakeholders that risks are effectively addressed.

Mistral is certified for the following scope:

Information Security Management System (ISMS) related to Design and Development of Systems consisting of Embedded Software, Embedded Hardware and VLSI (FPGA) for Defence Electronics, Product Designs and Semi-Conductor Technologies.

"As an organization, we have always laid a lot of emphasis in securing and protecting our customers' information from data breaches. With ISO 27001 certification, we add a value of trust and confidence to our customers and reiterate that their information is secure and confidential", said Mujahid Alam, CEO of Mistral Solutions.
